

ExxonMobil™ solutions can help you generate more with less.

ExxonMobil has eight Lube Oil Blending Plants (LOBPs) in Europe, Africa, and the Middle East. These LOBPs manufacture hundreds of Mobil™-branded lubricants and greases - from low-viscosity engine oil to energy efficient hydraulics fluids - delivering to partners and customers across the region.

Each plant in EAME is working on the reduction of impact across the supply chain so our operations can achieve more with less over time: enhanced productivity at the same time as lower greenhouse gas (GHG) emissions and less waste.

By choosing to work with the Mobil™ brand, you are choosing a supplier that puts sustainability at the heart of our operations - from the way we make and transport our products, to the efficiencies they deliver in your organisation.

¹ ExxonMobil's global lubricant operations receive Zero Waste to Landfill Silver validation
